

Sumeet Das

Kotlin/Android Developer

sumeet.ad.das@gmail.com | 9457200859 | Noida, India | github.com/PaPluckfii | linkedin.com/in/sumeetdas1996

PROFESSIONAL SUMMARY

Senior Android/KMM Developer with 4.8 years building enterprise-grade apps across fintech and ed-tech. Contributed towards Compose Multiplatform migration at India's first crypto exchange and scaled a multi-module SDK used across 13+ apps serving 100K+ users.

TECHNICAL SKILLS

Languages: Kotlin, Java, XML

UI Frameworks: Jetpack Compose, Compose Multiplatform (CMP), Android SDK, XML Layouts

Architecture: MVVM, Clean Architecture, Multi-module, MVI

Multiplatform: Kotlin Multiplatform Mobile (KMM), Compose Multiplatform (CMP), Ktor

Database: Room DB, SQLite, SQLDelight, MongoDB

Networking: RESTful APIs, Retrofit, Ktor Client

Testing: Unit Testing, JUnit, Espresso, Developer-driven QA

Tools & Practices: Hilt/Koin (DI), Coroutines, Git, GitHub Packages, Agile/Scrum, Code Reviews, Firebase

AI & Dev Tools: MCP (Model Context Protocol), Figma Connect, GSD, Ralph Wiggum, Agentic Workflows

WORK EXPERIENCE

SDE 2 | DVL Systems Private Limited

October 2025 – April 2026 | CP, New Delhi

Zebpay – India's First Crypto Exchange

- Primarily involved in end-to-end migration of the Android/iOS applications from Kotlin Multiplatform Mobile (KMM) to Compose Multiplatform (CMP), enabling a unified cross-platform codebase and sharing over 70% of codebase.
- Pioneered agentic development workflows using Model Context Protocol (MCP), Figma Connect and Skills, integrating AI-driven tooling directly into the development pipeline; leveraged GSD and Ralph Wiggum frameworks to automate repetitive dev tasks, reducing manual workflow overhead by ~40% and cutting design-to-code handoff time by 30%.
- Delivered feature enhancements and critical bug fixes across Zebpay's Android app, improving stability and UX for a high-volume fintech platform.
- Collaborated cross-functionally with backend, iOS, and QA teams to ensure seamless multiplatform integration and release quality.

SDE 2 | Nickelfox Technologies Private Limited

August 2021 – October 2025 | Noida, UP

Vantero – DM Ventures LLC

- Transitioned existing app to multi-module architecture, preparing for full Compose Multiplatform (CMP) migration across Android and iOS.
- Led 'Target Zero Bugs' initiative, eliminating 90%+ of defects through developer-driven testing, significantly reducing QA dependency.
- Managed a development team and delivered custom animated features improving user engagement.

Apps for POS – Innoviti Technologies Private Limited

- Developed enterprise Android POS applications enabling secure, seamless payment transactions for retail clients.
- Contributed to backend integration using Node.js and FreshDesk APIs, supporting robust customer support workflows.

IFSTA Apps – Oklahoma State University

- Built 13+ Android applications; flagship app ([Essential 7th Edition](#)) achieved 100K+ downloads on the Google Play Store.
- Delivered feature-rich companion apps for IFSTA books: Exam Prep, Audiobooks, Identification modules, Skill Videos, and Course content.
- Designed scalable multi-module architecture distributed via GitHub Packages, reducing development time by 70% across 13+ projects.
- Led a cross-functional development team, ensuring timely delivery of all project milestones.

EDUCATION

BE in Mechanical Engineering — O P Jindal Institute of Technology, Raigarh

2014 – 2018

XII (Science) — Jindal School, Barbil

2014
